DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: The third sentence recites: "When you expand it it will be...etc". A comma is missing. The third sentence should read, "When you expand it, it will be...etc".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 1 is rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph.

The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

Name of applicant and Title of Invention should not be in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Clare et al., (U.S. Patent Number 6033002). Clare et al., discloses the collapsible rack (column 8, line 36 – 41 and column 8, line 43 – 51) (See also Figures 15 and 16) that fits within the bed of an existing pick up (column 7, line 45 – 49 and column 7, line 64 – 65) (See also Figure 12). Furthermore, Clare et al., also discloses the rack that will lay flat on the bed until it is ready for use (See Figures 8 and 12), at which time the rack can be lifted to level the cabin roof (See Figure 7) and be used to carry material, that otherwise, would have not fitted in the bed (column 8, line 2 – 5). See also Figures 11 – 16).
